PRINCIPAL’S MESSAGE

Dear Parents and Carers

The school was certainly abuzz with excitement today for Market Day! The 5/6 students have worked hard to make and collect goods for the stalls. My personal favourite is the Cake Stall. It was very hard to choose what to buy. This is a great tradition for Ngunnawal Primary and it is something the students look forward to each year. I would like to congratulate the leadership and maturity the senior students displayed in organising this whole school event. Thank you also to the 5/6 teachers and support staff for your work in making Market Day a success.

I would like to welcome Marika Vreiling to Ngunnawal Primary School. Marika is the school’s new Literacy and Numeracy Field Officer and will be at the school for the remainder of this year and in 2015. Marika brings with her a wealth of knowledge about best practice literacy and numeracy learning and is looking forward to working with both staff and students at Ngunnawal Primary.

Last Thursday kindergarten and their year 3 buddies went on an excursion that included some time at the new Boundless Playground near the Carillon at Lake Burley Griffin. They had a very good time and were excellent ambassadors for the school. So much so, that I received an email from another ACT Public School principal letting me know how well behaved and considerate the students were! What great recognition for our amazing students and teachers.

Over the last eighteen months the literacy and numeracy team at the school have been involved in the PALLs (Principals as Literacy Leaders) program that has been run in the ACT. Teachers at the school have had the opportunity to attend a range of reading and writing workshops that showcase and demonstrate evidence based strategies that have an impact on improving the reading and writing outcomes for students. As a culmination Ngunnawal Primary was able to showcase the work of our teachers at the PALLs Learning Fair last week. Thank you to Natalie Otten, Kate North, Tracey Blackmore, Monica Dray and Belinda Denmead for their leadership and organisation of the Learning Fair presentation.

At this time of the year school is a busy place with end of year activities and celebrations, so it is wonderful to see the learning that the students are still engaged in. Last week I had several kindergarten students share their independent writing with me. Riley, Amelia and Romeo shared some very good sentences with me. They were able to tell me that they knew their writing was good because it made sense when they re-read it and Ethan, Runi and Alek from KHR were able to tell me they knew their writing was good because they used finger spaces and that they wrote their letters correctly. I think the kindergarten students are very ready for year one!

We have had a lot of calls regarding the end of term four date. This year the school term ends on Wednesday 17 December. This date is not an error as some people have thought. End of year reports will go home on Friday 12 December with portfolios going home on the last day of term.

Please let the front office know if your child is not returning in 2015. We are in the middle of creating the classes for next year and this information is very important as student numbers determine the level of staffing required for the school.

As always please contact myself or any member of the executive team if you have any questions or concerns you would like clarified.

Have a great week.

Regards

Kristine

Kristine Stewart,
Principal
**Spotlight on Learning!**

This week’s focus ...

**Brindabella**

This term we have been focusing on writing to instruct. We have learnt that instructions, directions and recipes are some of the methods people use to tell others how to do things. We have been looking at the purpose of instructions and what features a set of instructions should have. We then used this information to explain how to make a grass head and how to make a jam sandwich.

We are always busy reading and have been practising our fluency. We like reading out loud, to a partner and even to our toys. This helps us to hear how smoothly we are reading and if we are using expression.

In maths, we have been exploring place value and looking at the language used in number problems. We have been measuring using a range of objects such as paper clips, cubes and our own feet. We have also been using the language of chance when predicting the possibility of events occurring.

We have loved spending time with our buddies doing heaps of fabulous activities.

In Geography, we have continued learning about natural, constructed and managed features within our school environment and around Australia. We have learnt that these areas can change depending on people or the weather.

1J created this fabulous ice cream artwork by mixing one main colour with either a small amount of black or an increasing amount of white. They discovered that adding white lightened the shade of colour on their ice cream stack.

We enjoy dancing and have been busy preparing for the end of year concert. We can’t wait to perform on stage and show everyone our fabulous dance skills.

Cathryn, Chloe, Jill, Kate and Sarah
SCIENCE @ NGUNNAWAL
Quiz Questions:
1. RFID is a tracking system used in library and pet microchips. What does it stand for?
2. Which microorganism helps bread to rise?
3. Are quolls carnivores or herbivores?
4. Which chemical element has the symbol Na?
5. Which of these is a type of plate boundary found on Earth? Is it a) translate, b) transform, or c) transistor?

PARENTS AND CARERS SURVEY – ACT PUBLIC PRIMARY SCHOOLS
The ACT Education and Training Directorate is conducting an online survey of primary school and early childhood parents and carers as part of a wider research process on communicating the benefits of the public school system in Canberra.

As a parent or carer of a student in an ACT public primary or early childhood school, your views and feedback are very important.

The survey takes about 10-15 minutes to complete. Data collected goes directly back to Piazza Research (an independent Canberra-based research firm contracted by the Directorate to conduct this survey). The survey can also be accessed on mobile devices and tablets.

Your information is protected
This survey is completely anonymous and individual answers will not be tracked or attributed to an individual.

Who to contact
If you require help with completing this survey, please email admin@piazzaresearch.com.au as an initial contact point, providing a phone contact with an email address. Piazza Research will contact you from there.

The survey will be open until Friday 28 November.

I encourage you to complete the survey to help the ACT Education and Training Directorate in its research and thank you in advance for your participation.

Kristine Stewart, Principal

CHRISTIAN EDUCATION
The Combined Gungahlin Churches will deliver Christian Education at Ngunnawal Primary School on Wednesday, 3 December for kindergarten to year 6 students.

This term we will teach the children that when it was the right time God sent His Son to us at Christmas (Galatians 4:4). We will be using songs, stories and a game or quiz to teach the children from the Bible. We may ask for student volunteers from the school to participate in these activities.

If you have any questions regarding Christian Education, please call New Life Presbyterian Church on 02 6241 3750.

If you wish your child to attend the Christian Education sessions in 2014 and have not previously done so, please complete the permission slip below and return to the school by 1 December 2014.

PERMISSION NOTE - CHRISTIAN EDUCATION
I give permission for my child/ren to attend Christian Education sessions in 2014.

Understanding the Gifted Learners in our Classrooms

Recognising and understanding gifted learners is challenging for educators and parents alike. The characteristics and needs of students who are gifted are personal and unique, and recognising them involves understanding that these specific characteristics may be demonstrated through a variety of different behaviours often presenting differently in school compared to at home.

The ACT Education and Training Directorate Gifted and Talented Students Policy is based on the Francois Gagné Differentiated Model of Giftedness and Talent (2008). This model highlights the impact of environmental and intrapersonal catalysts on the development of giftedness towards talent or competency. Although intellectual or academic giftedness is only one of the domains in Gagné’s model, it is the domain which often requires the most differentiated response in the classroom.

Gifted students have characteristics and needs which are different from those of their same age peers. As a group, intellectually gifted learners comprehend complex ideas quickly, learn more rapidly and in greater depth, and may exhibit interests that differ from those of their age peers. They need time for in-depth exploration, to manipulate ideas and draw generalisations about seemingly unconnected concepts, and to ask provocative questions. Gifted learners find excitement and pleasure from intellectual challenge and show initiative and originality in work, particularly in areas of high interest and passion. At times gifted learners will show extraordinary degrees of motivation and a single-minded pursuit of goals, which their peers may find hard to understand. However, these students may also be self-critical in evaluating and correcting their own efforts, exhibiting perfectionist behaviours, which lead to task avoidance and the tendency to take criticism from others very much to heart.

Gifted students often demonstrate an ability to handle abstract ideas and flexibility in thinking, which allows them to consider problems from a number of viewpoints and show high levels of empathy for the feelings and circumstances of other people.

Gifted students possess a need for like-minded friends and longer-term relationships than their same aged peers and this often results in a preference for older friends or friendships with much younger, but equally gifted students. When like-minded connections are not available to them, they may experience feelings of isolation and rejection and subsequent accusations of social maladjustment from those around them.

It is important to recognise that gifted learners are not a homogenous group and that students may exhibit differing levels of giftedness across one or more of the domains outlined in the Gagné model. Equally, it is important to acknowledge that giftedness does not always translate to talent and thus underachievement may need to be addressed in the case of some gifted learners. Ultimately, gifted learners require support in order to achieve their full potential. To this extent, they are no different to any other students whose learning needs differ from the norm.

Workshops for Kindergarten, Year 1, Year 2 and Year 3

Monday 12th January, 2015
Tubular... Oil Rock

Tuesday 13th January, 2015
Phenomenal Physics... Aerodynamics

Wednesday 14th January, 2015
Chemical Chaos... Atmospheric!

Thursday 15th January, 2015
Digging Anthropology... Jurassic Park

Friday 16th January, 2015
The Time Machine... A Day with Pirates

Monday 19th January, 2015
Futurama... How to Catch a Monster

Tuesday 20th January, 2015
Amazing Architecture... My Classroom

Wednesday 21st January, 2015
Chemical Chaos... Cold, Cold, Cold

Thursday 22nd January, 2015
CEI... Crime Scene Investigation... The Antique Dish

Friday 23rd January, 2015
Find an Anthropologist... A Day in Italy

Tuesday 27th January, 2015
Get Into Gees: You're an Engineer... Build an Ant Farm

Wednesday 28th January, 2015
A Day in the Life of... Cartoonist

Thursday 29th January, 2015
Phenomenal Physics... It is Rocket Science, You Know!

Friday 30th January, 2015
Dr B. Ooga... Balls, Pipes, Sinks and Saws

HOLIDAY WORKSHOPS

Does your child have a bright idea?

Sign up to the Questacon Maker Project workshops for ages 10-15 years at the Ian Potter Foundation Technology Learning Centre in Canberra.

Full or half day workshops are designed for young people between 10-15 years to unleash their inner maker, designer or inventor.

Topics covered include:

THINK
To get kids thinking through challenges and problems

MAKE
To design and make a solution

TRY
To test and refine your creation

REFINE
To improve and develop your own ideas

Workshops will provide opportunities for students to create their own projects, make some really cool stuff, get great advice on their projects, and meet other students who share their interests while having heaps of fun along the way.

THE WORKSHOPS

FULL DAY WORKSHOPS

Date: 12 and 13 January (Monday – Tuesday)
Time: 9 am – 3 pm
Where: The Ian Potter Foundation Technology Learning Centre, 05 Belconnen Street, Deakin
Age: 10-15 years old
Cost: (Q Club members) $66.00 per workshop per participant (incl. GST)
Non-Q Club members $81.00 per workshop per participant (incl. GST)

Each workshop run for a single day from 9 am to 3 pm. Children are welcome to attend more than one workshop.

3D DESIGN

Monday 13 January
Tuesday 14 January
Can you design and print your own object in 3 dimensions?

ROBOTS

Monday 14 January
Tuesday 15 January
Rays, servos, servos, servos... create your own robot controller

HALF-DAY WORKSHOPS

Date: 14 – 15 January (Wednesday – Thursday)
Time: 9 am – 12 pm
Where: The Ian Potter Foundation Technology Learning Centre, 05 Belconnen Street, Deakin
Age: 10-15 years old
Cost: (Q Club members) $44.00 per workshop per participant (incl. GST)
Non-Q Club members $59.00 per workshop per participant (incl. GST)

Each workshop run for a single day. Children are welcome to attend more than one workshop.

ENGINIOITY
Yes, 15 January
Engineer a robot and eliminate obstacles

BUILDING ROBOTS
Yes, 16 January
Create a robot using card, motors and other materials

MAKESHOP MAKERS
Yes, 16 January
What can you construct with the power stored in a solar array?

Participants will need to arrange their own transport and provide their own sunnies, tea, lunch and afternoon tea (you can arrange for small items to be refrigerated).
